PATTERSON® VETERINARY | **PattLock®** a Patterson Technology

WITH YOUR DATA
UNDER LOCK AND KEY

In this day and age, a viable data backup and recovery plan is crucial to keep your business up and running. You just never know when lightning will strike – a virus attack, natural disaster, hardware malfunction, human error or unforeseen occurrence.

That's why we designed PattLock – an affordable and user-friendly addition to any existing backup solution.

PattLock uses an Internet connection to transmit your valuable data (encrypted, of course) and store it in a safe and secure location. Best of all, the software is compatible with all practice management software systems, as well as all file types – providing seamless and trouble-free backup of your veterinary practice's database files – all for a low monthly fee.

PATTLOCK.

YOUR SILENT DATA GUARDIAN.

IRONCLAD DATA PROTECTION

PattLock takes extensive steps to safeguard your practice's data. Data storage equipment is housed in redundant Tier 4 data centers with high-tech security, fire suppression, backup power, leak detection and climate control.

For the ultimate in protection, your data is then backed up to a second storage center – allowing you to go about your business with one less thing to worry about.

PATTLOCK KEY BENEFITS

• Reduces downtime
• Guarantees seamless business operation
• Prevents business paralysis
• Tenfold return on your investment (in terms of the time and hassle you save in recreating files)
• Seamless integration
• Ensures data accuracy
• Easy and fast recovery
• Fits into your schedule and practice's unique needs
• Confidence and knowledge that the issue will be resolved
• Peace of mind…at a price you can afford!

SO THE QUESTION IS, *"Why wouldn't you take advantage of these great features and benefits to provide the security that your veterinary practice deserves?"*

PATTLOCK KEY FEATURES

• Restores lost data in the same format in which it was saved
• Retrieves data with just a few mouse clicks
• Compatible with all practice management software systems and file types
• Allows you to customize scheduling for exactly when and how often your data is backed up
• Multiple layers of security
  • *Data is encrypted and compressed before transfer across the Internet; secure level of data encryption ensures that no one will be able to view your data on our servers*
  • *Data storage equipment is housed in centers with high-tech security, fire suppression, climate control and other safety measures*
  • *Data is backed up to a second storage center*
  • *Username and password prevents unauthorized access of your account and files*
  • *You receive verification that your data has been successfully backed up*
• If issues arise, you get access to Patterson Veterinary's legendary technical support
• Low monthly fee
